

Investing in our Health & Wellness Associates

In many communities, Walmart's pharmacy and vision center associates are the most accessible healthcare providers for busy families. Whether it's offering prescriptions and immunizations at everyday low prices, providing counsel, or helping customers who rely on them to save money so they can live better, these associates are making a difference.

As our Health & Wellness business continues to grow, we're serious about being an employer of choice for the talented individuals in these fields.

The average salary for pharmacists is now **more than \$140,000** before **bonuses and incentives.**

More than **3,700** pharmacists received a raise.

More than **4,000** opticians will receive raises.

Opticians can now access certification and licensure training that's **100% paid for by Walmart.**

Once raises are effective, we expect the average hourly wage for opticians to be **more than \$22.50.**
